

Healing Of Christ Outlined

Value to all mankind of the healing ministry of the Master will be stressed at Christian Science church services Sunday, in the Lesson-Sermon entitled "Christ Jesus."

Luke's account of the healing by Christ Jesus of the man with the dropsy will be included in the Bible selections. "There was a certain man before him which had the dropsy. And Jesus answering spake unto the lawyers and Pharisees, say, Is it lawful to heal on the sabbath day? And they held their peace. And He took him, and healed him, and let him go."

These affirmations by Mary Baker Eddy are from the Christian Science textbook, "Science and Health with Key to the Scriptures." "When man is governed by God, the ever-present Mind who understands all things, man knows that with God all things are possible. The only way to this living Truth, which heals the sick, is found in the Science of divine Mind as taught and demonstrated by Christ Jesus."

The Golden Text is from Paul's letter to the Colossians. "As ye have therefore received Christ Jesus the Lord, so walk ye in him: rooted and built up in Him, and established in the faith, as ye have been taught, abounding therein with thanksgiving."

FBI Director J. Edgar Hoover says our yearly crime bill amounts to the equivalent of \$128 a year for every man, woman, and child in the nation. For every dollar spent on education \$1.11 goes to crime, and for every dollar contributed to religious organizations \$9 goes to crime.

SOCIAL EVENT . . . Members of the South Bay Young Republican Club make final arrangements for the organization's cocktail dance starting at 9 p.m. Saturday at 4020 Pacific Coast Hwy., Watteria. Shown, left to right, William B. Haughey, vice president; Mrs. Stanley B. Jones, secretary, and Dr. Allan P. Lamont. (Herald Photo)

Minnesota Prof at El Camino

Paul R. O'Connor, visiting scientist in chemistry from the University of Minnesota, is currently conducting a three-day visit at El Camino College. William T. Mooney, assistant director, division of physical sciences, announced today.

As visiting scientist, O'Connor is lecturing on four subjects, repeated four times, to the students and faculty in chemistry.

These include the subjects "Use of Isotopes in Studying Chemical Systems," "Radioactive Dating Methods," and "Molecular Orbitals."

Objectives of the program are to stimulate and strengthen the chemical program in colleges by presentation of crea-

tive and productive men now active in the field and to acquaint scientists with the scope and quality of work being conducted in junior college campuses.

O'Connor's visit has been made possible through a joint effort of the American Chemical Society, the National Science Foundation, and El Camino College.
